proven IT

Virtual CISO Services

Our vCISO services empower you with CISO expertise, strategic guidance, and proactive management - without the CISO expense

CYBER THREATS ARE ON THE RISE, PUTTING BUSINESSES LIKE YOURS AT SERIOUS RISK.

In the past year, 65% of small and mid-sized enterprises faced cyberattacks. With stricter regulations and insurance requirements, compliance has never been more critical. Cybersecurity is essential—you need an expert to assess risks, strengthen defenses, and safeguard your operations.

Introducing vCISO Services
Strategically Define, Manage, and Enhance Your Security Programs

Keeping your security systems safe and secure is more important than ever in today's rapidly changing technology environment. Discover what Proven IT has to offer:

Tailored Security Programs

Develop actionable, custom security program and polcies based on your environment, industry benchmarks, and regulatory needs.

Compliance Readiness

We identify required regulations, assess compliance readiness, pinpoint gaps, create a plan to address them, and work with you on execution.

Risk Assessments

We assess your risk level and cyber posture through questionnaires and scans, comparing them to industry benchmarks and identifying vulnerabilities and gaps.

Remediation Plans

We develop strategic remediation plans with prioritized, clearly explained tasks, including impact and criticality ratings for easy implementation.

Ongoing Management & Optimization

We oversee remediation plan execution—monitoring, scanning, and adjusting as needed—so you can focus on your business with confidence in your digital security.

Cyber Posture Reporting

We provide detailed reports on your security posture, trends, compliance gaps, and industry benchmark comparisons to track progress and identify improvements.
