

# Microsoft Copilot + AI Agents

Work Smarter. Automate Faster.  
Scale Without Adding Headcount

## ✓ Proven Benefits

- **Secure integrations** with Microsoft 365, Teams, SharePoint, CRMs, ERPs, and line-of-business apps
- **Automated workflows** that eliminate repetitive tasks
- **AI Agents** that handle inquiries, triage requests, and execute actions
- **Enterprise-grade governance** to ensure compliance and data protection
- **Role-specific copilots** for HR, finance, operations, sales, and IT
- **Expert support** from Proven IT to guide strategy, deployment, and adoption

## Trusted AI Automation Tailored to Your Organization

Not all automation is created equal, and generic AI tools often fall short. At Proven IT, we design Copilot + Agent solutions around your workflows, goals, and security needs.

From automating routine tasks to building intelligent agents that handle inquiries, triage requests, and surface insights, we deliver AI systems that scale with your team. Whether you're streamlining operations, supporting remote staff, or accelerating decision-making, our approach is tailored to your business and IT environment.

With us, you gain more than a tool - you gain a strategy.

# Top Automation Challenges Businesses Face Today

Teams struggle when information is scattered, processes vary, and workloads keep rising. As organizations grow, these issues compound - draining productivity, increasing risk, and putting pressure on both leadership and IT. These are the challenges that bring companies to us when they're ready to modernize with AI.

## Information Overload

Employees waste hours digging through emails, drives, and systems for basic information, slowing decisions and creating costly delays.

## Limited Visibility

Executives often lack real-time visibility, leaving them to rely on outdated reports or gut instinct, making confident decision-making harder.

## IT Team Stretched Thin

IT teams are buried in repetitive support tasks and constant firefighting, leaving little time for strategic work and slowing innovation.

## Pressure to Modernize

Expectations for speed, accuracy, and digital maturity are rising fast, but many organizations lack the time, resources, or clarity to move forward.

## No Time for Strategy

Teams are buried in admin work and routine tasks, leaving little time to focus on the initiatives that truly move the business forward.
